

**Full Stack Web Developer
Execulink Telecom
Woodstock, Ontario**

At Execulink, our Mission is to connect you to everything that matters with the affordable and awesome experience you deserve. Our customers are our top priority so having the customer service data base running efficiently and without error is key.

As we grow, we're excited to be adding a Full Stack Web Developer to our team. Reporting to the IT and Special Projects Manager, the Developer will be primarily responsible for the customer service data base, and is responsible for maintaining and managing the internal billing system.

Duties include supporting staff when issues arise, maintaining and improving the current code base, and working on new tools to help staff with daily processes. In addition, the Full Stack Web Developer will help to arrange project requirements in programming sequence by analyzing requirements through preparing work flow charts and diagrams pertaining to subject matter, programming language and logic. You will be programming for Perl, Javascript, Mysql, and Linux. You will also program computers by entering coded information, conducting tests, and modifying program sequence codes. Any other duties may be assigned from time to time.
