HOSTED PHONE SOLUTION

Stay Connected with Execulink's Hosted Phone Solutions

Gain complete control over your business communications with Execulink's Hosted Phone Solutions. Hosted on our secure private network, this system simplifies your communications infrastructure by eliminating the need for constant hardware upgrades and complex system management. Our solution is scalable, offering both pre-packaged and customizable options to perfectly align with the size and needs of any business.

Technology Support: We support a wide array of industry-leading desktop IP phones, software phones, and telephony equipment, ensuring affordability and meeting diverse employee needs.

Key Features and Capabilities:

Efficient Call Management: Utilize Auto-Attendants for professional call handling, alongside features like Call Queues and Line Hunting for optimized call distribution.

Enhanced Mobility: The Flexible Extension feature ensures you and your team can stay connected, whether you're in the office or on the move.

Professional Call Handling: The Premium Attendant feature supports multi-department forwarding and manages high-call volumes effectively, creating a professional front for your business.

Versatile Group Calling: Multi-Line Hunt Group is ideal for managing multiple incoming calls simultaneously, ensuring that no call goes unanswered.

Network Flexibility: Execulink's Hosted Phone Solutions are optimized for performance across any high-speed internet connection, offering exceptional versatility and reliability. For the highest quality and most reliable service, using Execulink's own internet services is recommended. Whether you choose to connect through Execulink or another provider, our system is designed to deliver consistent, high-quality communication.

Benefits:

Universal Accessibility: Maintain a unified communication network across multiple offices. Our system allows you to manage your business from any location, seamlessly integrating calls between office and remote settings.

Cost-Effectiveness: Dramatically reduce your telecommunications expenses. Eliminate unnecessary lines and simplify your administrative processes, allowing for easy system upgrades and extensions.

Dynamic Communication: Replicate an in-office environment from your mobile device, enabling dynamic interaction and management of calls as if you were at your desk.

Packages and Pricing

Choose from our Flexible Workspace, Essential Workspace, or Enterprise Workspace, each designed to meet the specific needs of your operation.

The Flexible Workspace solution is a great solution for the business that operates on the go. Create a professional attendant, hold music, and multiple call groups to emulate an entire team. All from a Mobile App and/or PC Soft Client, no physical hardware required!

The Essential Workspace solution is great for businesses with 4-20 users who require a physical phone in their office and require a streamlined voice solution for continuous growth.

We can also design a custom Hosted Phone package to suit your needs.

Setup & Support

Our dedicated support team ensures smooth setup and integration. We provide comprehensive assistance from initial equipment setup and service migration to ongoing maintenance and employee training.

“ Our management team has been using Execulink’s [Flexible Extension] client as part of our hosted system for over a year. We have found the service to be reliable and very convenient. It allows our managers to remain connected to our hosted phone system and have the same functionality even when we are out of the office. The [Flexible Extension] client has become an integral part of our service. ”
