

Execulink Awards Annual Scholarships to Local Students

(Woodstock, ON) September 25, 2024 – Execulink Telecom is proud to announce the recipients of its annual Scholarship Program, awarding \$500 each to three exceptional students pursuing post-secondary education. This year's winners are Leah Wells from Ilderton, attending Western University; Emily Hall from Woodstock, attending McMaster University; and Natalie Telfer from Belmont, attending Wilfrid Laurier University.

The recipients were selected based on their outstanding academic performance, with a particular focus on math and science, as well as their dedication to community involvement. The program recognizes young leaders who have excelled both in their studies and through meaningful contributions to their communities.

"At Execulink, we believe in the power of education and the importance of investing in our future leaders," said Ian Stevens, CEO of Execulink. "We are proud to support these exceptional students as they continue their academic journeys, and we look forward to seeing the positive impact they will undoubtedly make in their communities and beyond."

Applications for the 2025 scholarship program will open in early summer, giving students another opportunity to be recognized for their hard work and community spirit.

Execulink has a long-standing commitment to supporting youth in the communities it serves. For more information about Execulink and its community initiatives, please visit <https://www.execulink.ca/community/giving-back/>.

About Execulink Telecom In operation since 1904, Execulink Telecom has evolved from a small independent local telephone company into one of the leading telecommunications providers in Ontario. Through innovation and forward-thinking, we cultivated our local telephony offerings to provide a full-scale suite of telecommunications services including data, internet, television, mobility and advanced voice features. These services are now available to all levels of industry, encompassing 50,000 business, enterprise, government, and residential customers.
