

# QUICK CONNECT GUIDE

## FIBRE INTERNET, TV & PHONE PREMIUM ROUTER & ONT SETUP

### WI-FI PASSWORD:

Your new Wi-Fi Password is the last 8 digits of the number shown beside "FSAN" on the box sticker. You can also update your Wi-Fi credentials on MyExeculink.

VIEW OUR HELP VIDEO AT [EXECULINK.CA/FIBRE-PREMIUM-ROUTER](http://EXECULINK.CA/FIBRE-PREMIUM-ROUTER) OR CALL 1-877-393-2854

## STEP 1: DOUBLE CHECK

Make sure you have the following components in your High Speed Internet package.

### Optical Network Terminal (ONT) & Power Adaptor

You will have either the GPON - 812G ONT or the 716GE-I ONT with minor differences in setup. The technician will pre-connect the ONT to the fibre going outside your home.

### Premium Wi-Fi Router & Power Adaptor

### Ethernet Cables (x2)

Colours may not be exactly as shown.

### Phone Battery Backup

Only included with a phone service.

## STEP 2: CONNECT ROUTER & ONT

1. Make sure all equipment is unplugged.
2. Connect one end of the Ethernet cable to the Ethernet 1 or LAN 1 port on the ONT (port is different depending on the ONT model).
3. Connect the other end of the Ethernet cable to the WAN port on the router.

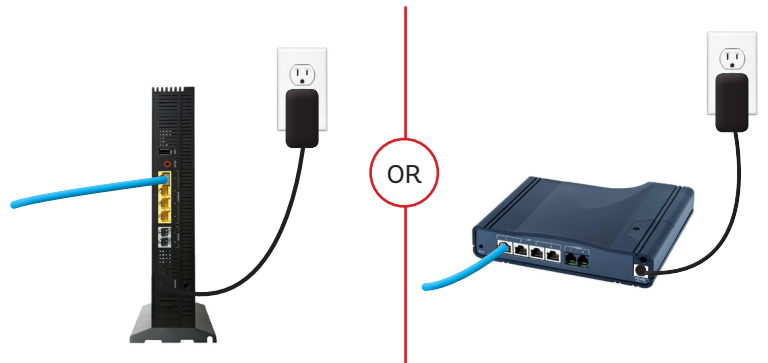

OR

## STEP 3: POWER UP ONT

Plug in the ONT's power adaptor into the Power port, and the other end into a wall outlet. Ensure the pins in the power cable line up to the port or damage could occur.

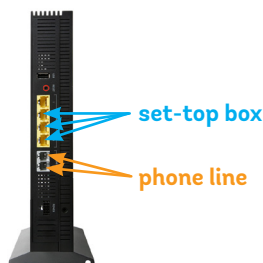

If you are installing a Phone service, plug the ONT's power cord into the battery backup instead, then plug the battery backup into the wall outlet.

## STEP 4: CONNECT TV & PHONE TO ONT (if applicable)

### TV SETUP:

1. Plug an Ethernet cable directly into Ethernet port 2, 3, or 4, or Lan 2, 3, or 4 of the ONT, depending on the model shown.
2. Plug the other end of the cable into your set-top box. If done correctly, the Lan 2, 3, or 4 light(s) will come on solid or flashing once set top box is powered on.

OR

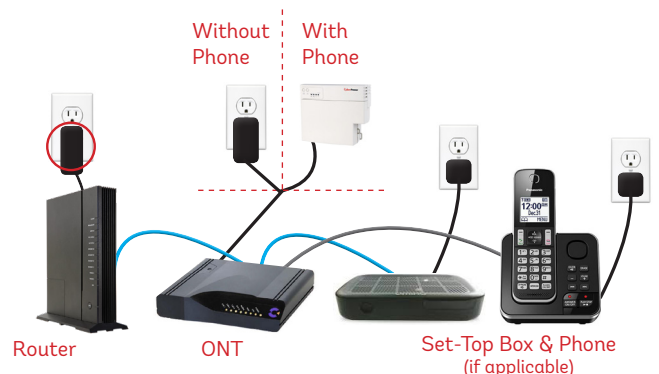

### PHONE SETUP:

1. Plug a telephone cable directly into the "Phone 1" port on either model of ONT, and the other end into your home phone.
2. If you have two lines, connect the second line into "Phone 2" and the other end into your home phone.

## STEP 5: FINAL SETUP

1. Plug in the router's power adaptor and push the ON/OFF switch to ON and allow the router to boot up.
2. After four minutes the Power, Service, and Wi-Fi lights should be solid green or blinking on the front panel of the router.
3. Use your password to connect your devices to Wi-Fi.
