

Execulink Telecom Introduces Innovative Smart Home Services

(Woodstock, ON) December 12, 2023 – Execulink Telecom, a leading provider of broadband services in Southwestern Ontario, is thrilled to announce the launch of its innovative Smart Home Services; designed to elevate the way customers live, interact with, and experience their home. Execulink's Smart Home services allow customers to easily monitor their household, automate smart enabled devices, control energy management, and customize device schedules for a smarter and safer at home experience.

Ian Stevens, CEO of Execulink Telecom, expressed his enthusiasm about the introduction of these ground-breaking services, stating, "Smart homes are no longer a luxury but a necessity in the modern world. Our new products are aimed at providing individuals and families with a more connected and efficient living experience. We believe these products will not only simplify daily routines for our customers, but also enhance overall quality of life."

At the heart of Execulink's Smart Home system is the user-friendly Alarm.com application. This app enables customers to exercise full control over their entire Smart Home system, allowing them to remotely manage their home from their smartphone, regardless of their location. In addition, the app seamlessly integrates with a wide range of compatible Z-Wave and Wi-Fi devices customers may already have in their home.

Smart Home packages are available to Execulink Fibre and Hybrid Fibre customers, further expanding the benefits of their already robust internet solutions. The new services are offered in two distinct packages starting with the **Smart Camera** plan at \$15. This package includes a choice of an indoor, outdoor, or doorbell camera, self-monitoring capabilities, 3,000 monthly video recordings, live video alerts, and custom analytics. For those looking for even more advanced smart home features, the **Smart Camera Plus** plan is available at \$28 per month and also includes a choice of indoor, outdoor, or doorbell cameras, with all the features of the Smart Camera Package. In addition, customers will have the option to select either a Smart Plug or a Water Sensor and will enjoy the complimentary installation of a Smart Gateway, ensuring seamless integration with a wide range of compatible Z-Wave devices.

"Execulink's Smart Home services offer a whole new level of convenience and control to our customers, providing them with the tools they need to monitor and automate their homes." Says Stevens, "With features such as live video alerts, custom analytics, and the ability to connect to various smart devices, customers can now enjoy peace of mind with a smarter and ultimately safer home. The future of Smart Home is endless and we can't wait to see where it takes us next."
